

D.A.M

'QUICK' REELS

The successful combination of tradition and modern age

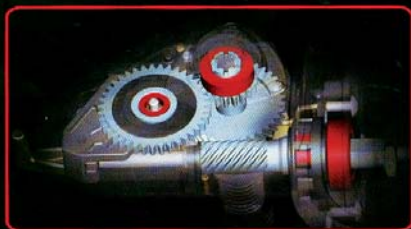

This very special reel project has been a long term wish for ourselves and will also surprise many of our true D.A.M.-fans!

More than three and a half years of planing, preparation, development and numerous test have been necessary in order to bring the legendary 1000 series back into life in its most modern version, but now we have finally managed! These reels truly represent the perfect combination of tradition and up to date technology. A target that the New D.A.M. has clearly set itself, to which we stick and which clearly separates us from our competitors, - with success!

Technically the new 1000 series is based on the well proven and almost indestructible direct drive system of an especially cut massive brass drive gear and also special cut stainless steel pinion gear. The oscillation and line lay is guided by the well known S-oscillation system.

Like in the old times the spool is equipped with a 4 point line lay adjustment system for extremely thin or thick lines. Also the very practical Quick@-Snap handle folding system from the past is part of the features.

With the history in mind all further details have been adapted accordingly to modern technology. The result are reels you don't want to lay out of your hands again, with which you are directly fishing at the pulse of time and with which you feel as a part of the decades of successful living history behind these reels.

DESCRIPTION

DAM Quick 1000: 100yds/.25 Line Capacity 1:4.8 Ratio
DAM Quick 2000: 100yds/.35 Line Capacity 1:4.8 Ratio
DAM Quick 1000: 100yds/.45 Line Capacity 1:4.1 Ratio
DAM Quick 1000: 100yds/.55 Line Capacity 1:4.1 Ratio

Direct Drive System:

- Through the direct gear connection of brass drive gear and stainless steel pinion gear a most calm, stable, stable, durable and powerful transmission can be achieved.

(1000 has Brass pinion gear)

Push button spool changing system:

- Beside the extra grip of the soft touch front drag knob the new Quick@ series is also again equipped with the most convenient push button spool changing system.

Quick@-Snap handle folding system:

- The unique Quick@-Snap handle folding system combines highest strength and functionality with a perfect classic look.

4-way line lay adjustment:

- Through the 4-way line lay adjustment the line lay can individually and perfectly be adjusted to any line type and diameter within a few seconds.

FEATURES:

- *Quick-Snap Handle Folding System
- *Ergonomic Soft-touch Handle knob
- *Stainless Steel Axle
- *Aluminium Bail with rest function
- *Anti-Twist Line Roller
- *Rotor with Anti-Vibro System
- *4 point line lay adj. intergrated in the spool
- *Push Button Spool System
- *Metal Spool with Holes
- *Spare Spool
- *Lifetime Manufacturers Guarantee
- *Designed, Engineered & Tested in Germany
- *Limited Edition with Serial Number
- *Direct Drive throught Brass drive gear & SS Pinion Gear
- *S-Curve Oscillation Gear
- *9 SS Ball Bearings
- *1 Instant Anti Reverse needle bearing
- *Housing, Rotor, Spool & Handle made of Duraluminium
- *Multi Disc Front Drag
- *Soft Touch Drag Knob
- *Micro Drag Adjustment
