Introducing the New PrawnStar Colour... "RANGA"

The bright orange tones of the Ranga make it a real standout. In testing, Ranga has proven to be a real success for estuary species, with the Original, Junior and Shrimp sizes accounting for bass, bream, barra, mangrove jacks, flathead, tarpon, cod and more. The winner of the recent 2009 Flathead Classic on the Gold Coast, Keith Stratford has been testing the prototypes for us and was quoted saying "The Ranga Prawnstar is an absolute killer for flathead and perfect for dirty water Jacks. Its bright orange colour makes it a standout in dirty water and perfect for engaging fussy feeders.

It's an essential addition to every keen anglers arsenal."
