

The New Live Fibre Sportfishing Series VENOM rod range is unlike anything released from the Live Fibre stable.

With New blanks & 13 New models this range covers all Jigging, Live Baiting & Popping applications.

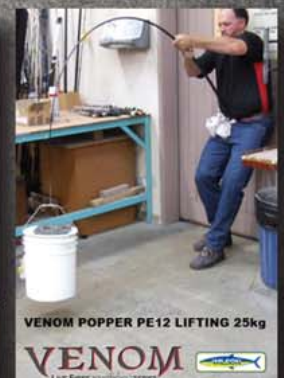

The blanks themselves are something very radical with an unmatched power to weight ratio ie) the 450 PE 5-10 blanks comes in at 107grams and can dead lift above 40kg of weight!

With the highest level of FUJI components and looks to match, these powerful and precise rods will stand above the rest.
